

Atomic Dandelion Tutorial

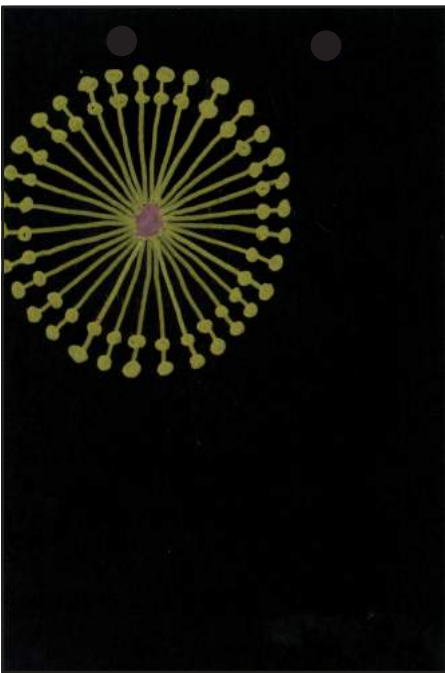

1. Draw a center circle. Draw 4 radiating lines out to divide into quarters. Add another line in between to make eighths.

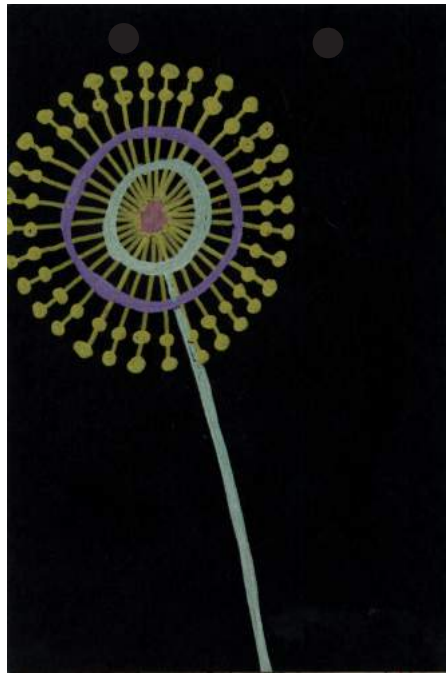

2. Split each space in half again with another centered line in between each.

3. Split each space in half again with another centered line in between each.

4. Draw a row of ball at the end of each line. Add another row of balls.

5. Draw circles inside, using different metallic colors. Finish with a stem.

6. Start another dandelion with the center and repeat steps until your page is full.
