

# Paint a Coffee Haunted House

1. Paint a wobbly ground line and simple house above it.

2. Add lots of building add ons around the center house. Make them different in size and height. Add a few chimneys.

3. Paint a tree. Start with lines and then make the trunk and branch thick and wobbly. It will make the tree look older and scarier.

4. Add windows and doors to the house. Some may be broken and hanging from hinges. Fill in the roof with the darkest brown color.

5. Paint the ground a medium shade and sprinkle grounds while wet to make spots. Fill in the house with lighter shade, trying not to smudge the lines.

6. Paint the sky the lightest color. Take care again to paint just up to the paint lines, trying not to smudge them. Leave an empty circle for the moon.

Dark Brown

Medium Brown

Light Brown

Very Light Brown
