

How to Make a Gum Wrapper Paper Chain

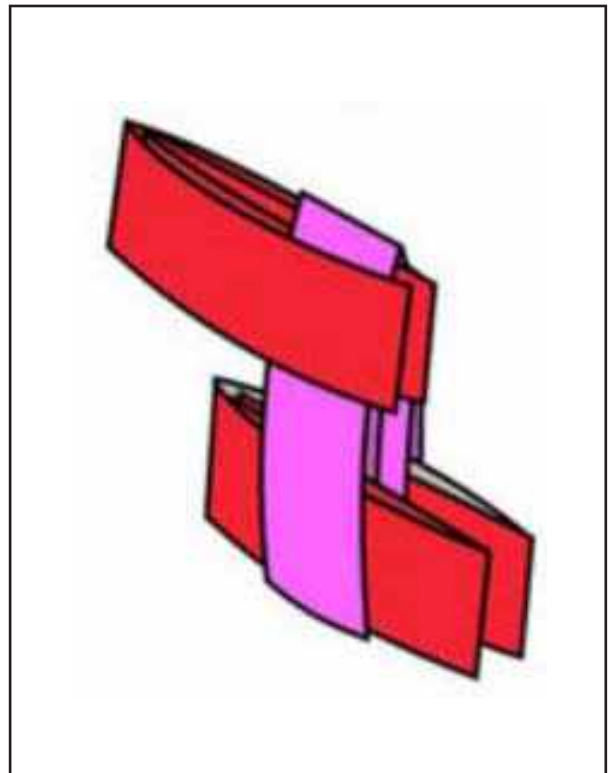

1. To make one link, fold a strip in half, wrong sides together, and make a crease. Open it up and fold each side in half again. Fold both sides together to look like "bunny ears". Press to make flat. Repeat for all links.

2. To start the chain, line up two paper links as shown.

3. Slide each "bunny ear" INSIDE the other "bunny ear".

4. Add another link the same way, always making a zig-zag line. If you see a square instead, It just means you have just slide it inside the line in the wrong direction. Take the link out and insert it from the other direction.
