

Pencil Self Portrait Tutorial

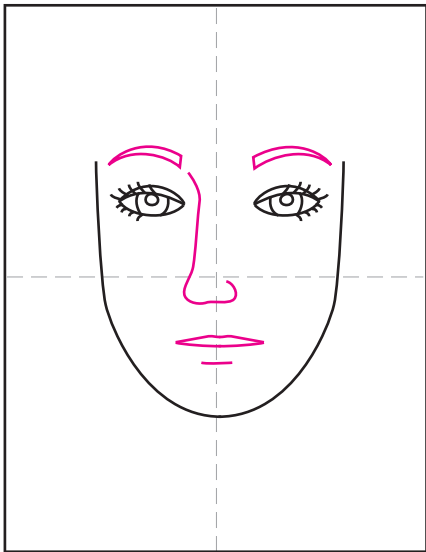

1. For best results, use watercolor paper and soft 2HB pencil. Draw a U shape.

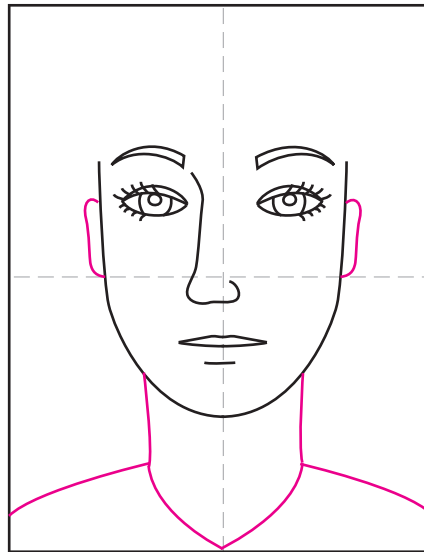

2. Add the almond shaped eyes and lid lines inside.

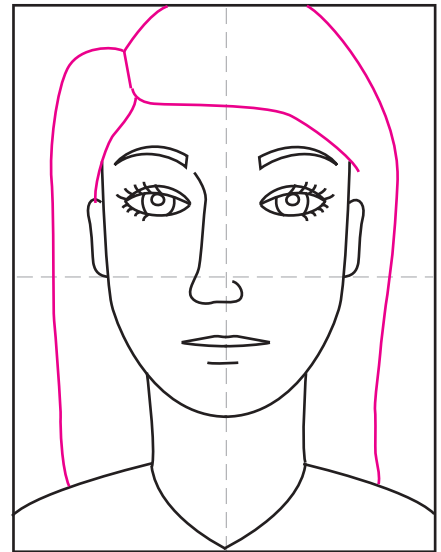

3. Draw the iris and pupil and then add the eyelashes.

4. Add the brows, nose and mouth.

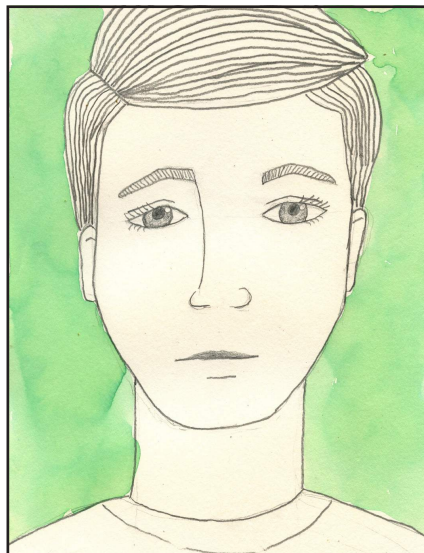

5. Draw ears, neck and shoulders.

6. Add the main hair lines. Drawing hair in sections may help when adding lines.

7. Shade the eyes and mouth, then fill the hair with lines. Make them as close as possible without touching.

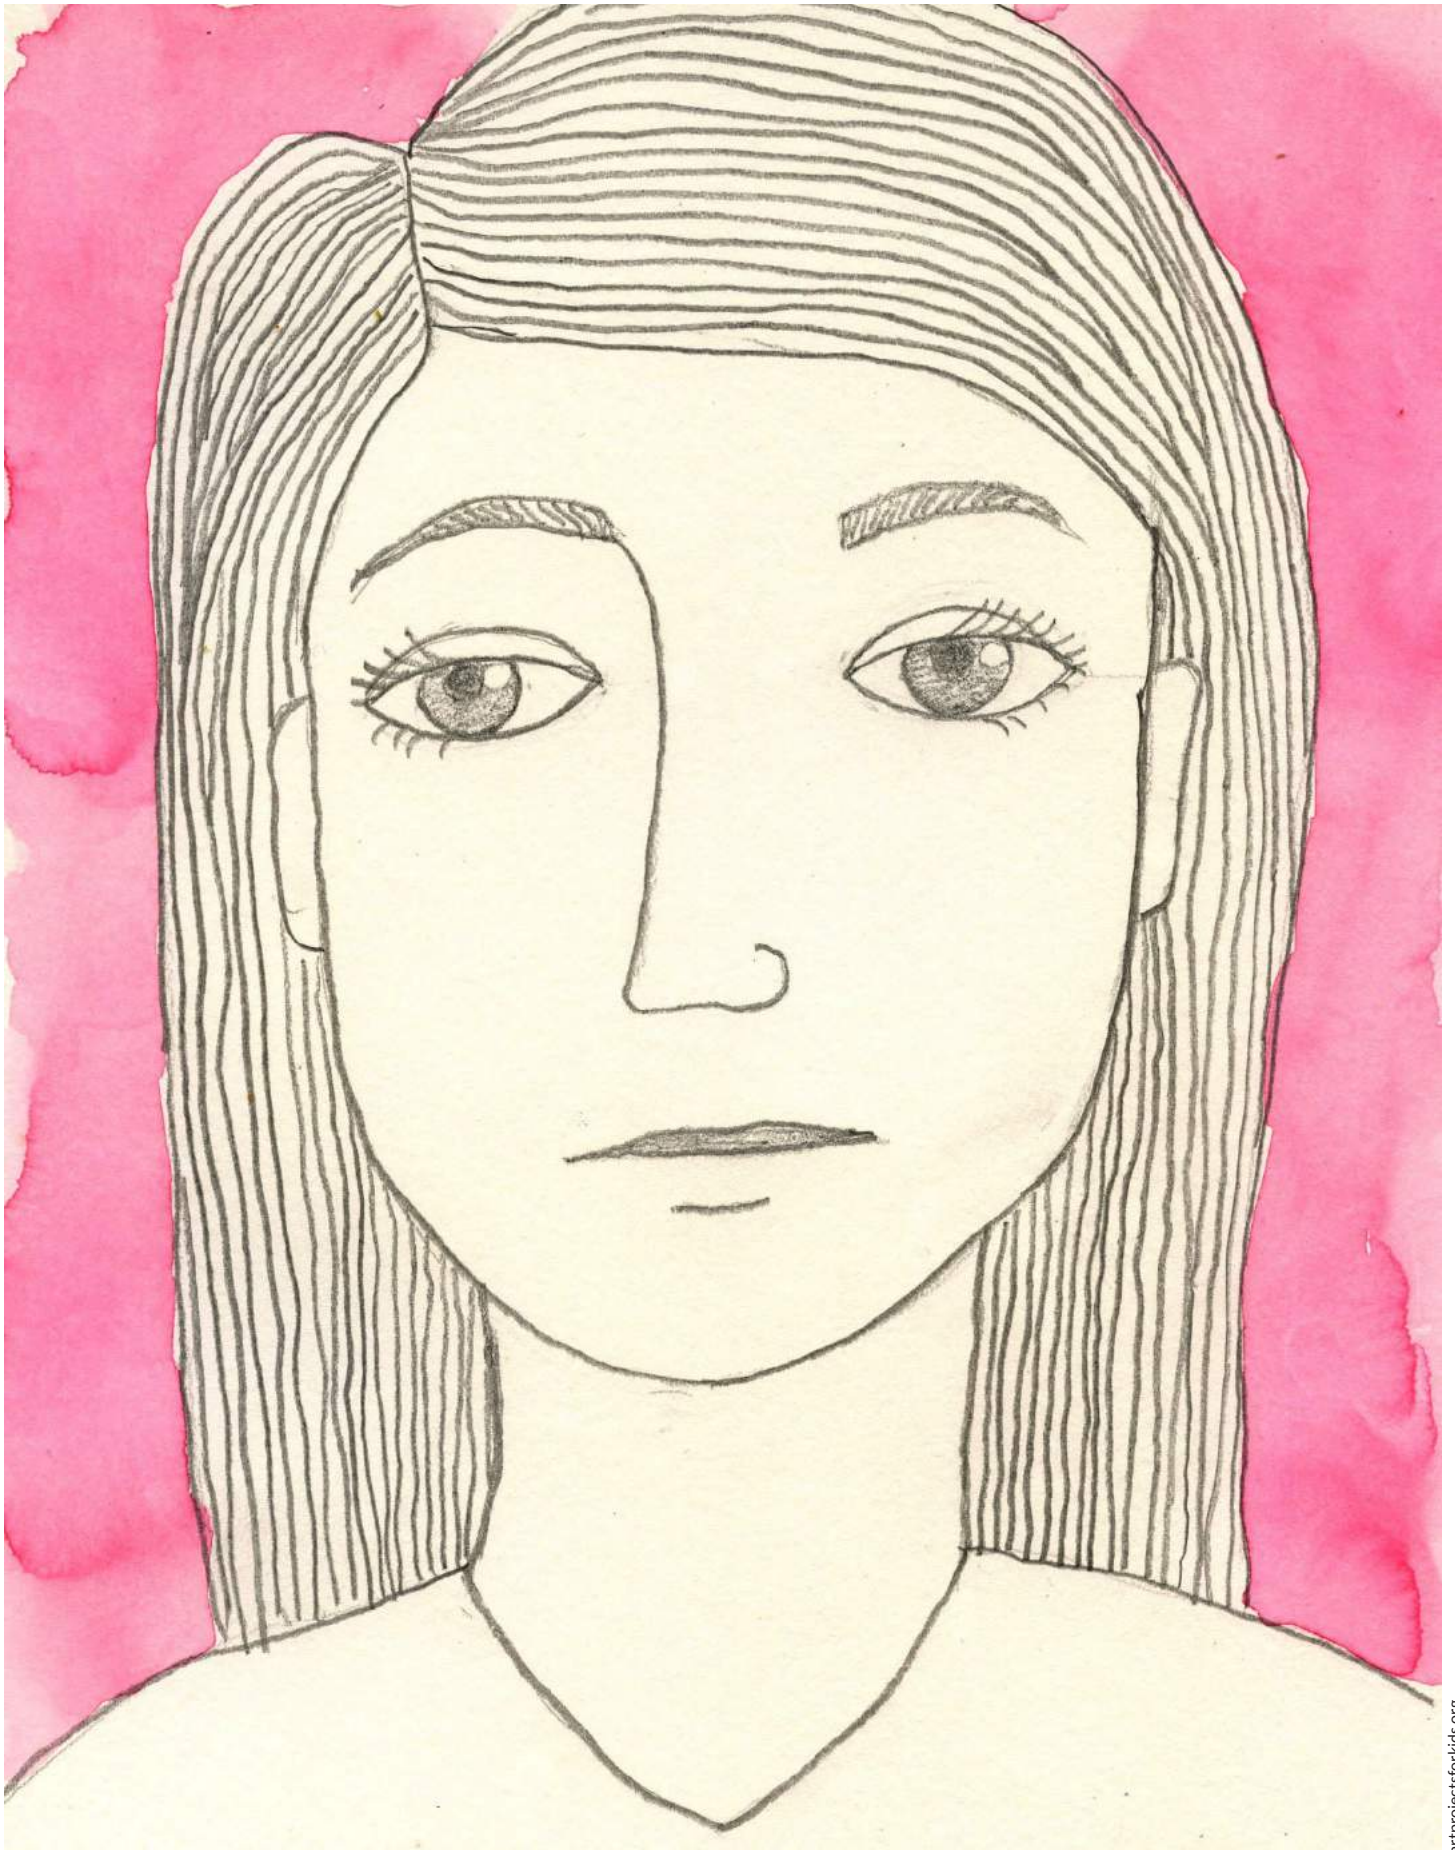

8. Another example of how to draw hair.

9. Paint background with very light watercolor paint.
