

# Draw the Very Hungry Caterpillar

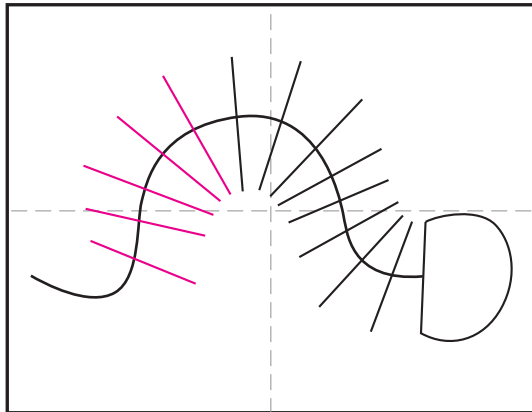

1. Draw a large D shape and a curvy line with a hump in the middle.

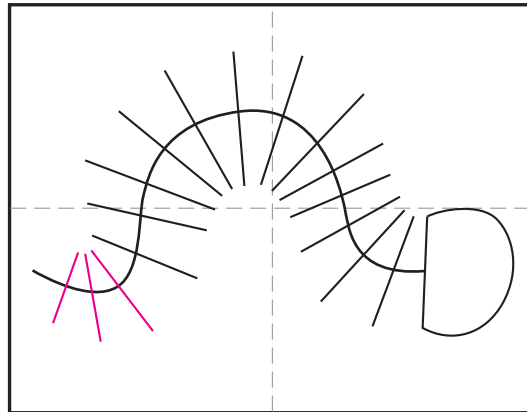

2. Start adding lines along the curve shape. They need to turn with the line as shown here.

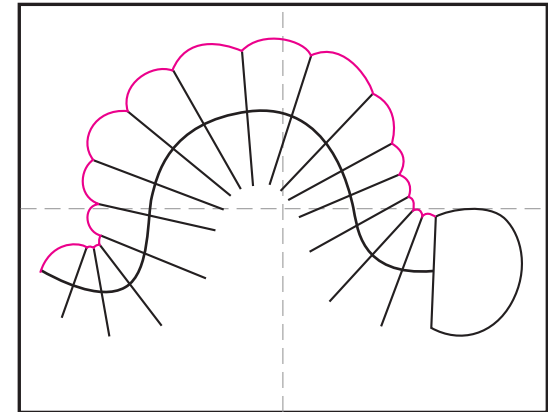

3. Add more lines that follow the curve. Try to make them all the same length.

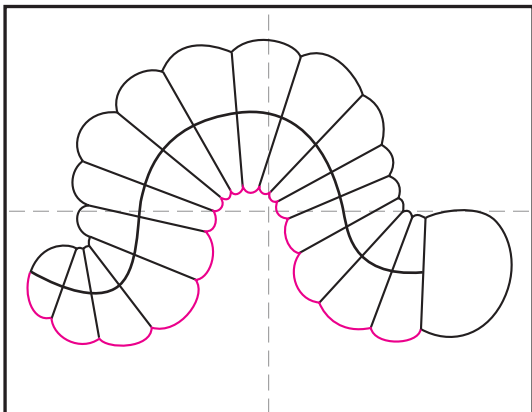

4. Continue with more lines that follow the curve.

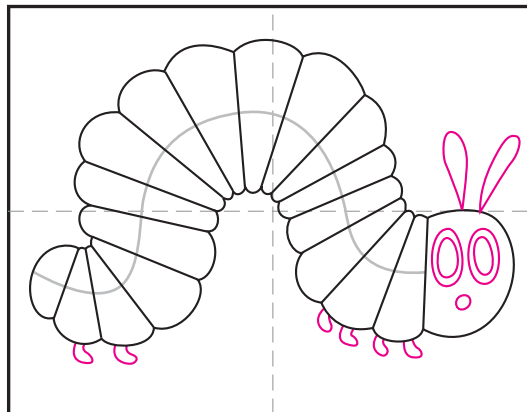

5. Finish with a few shorter ones at the end.

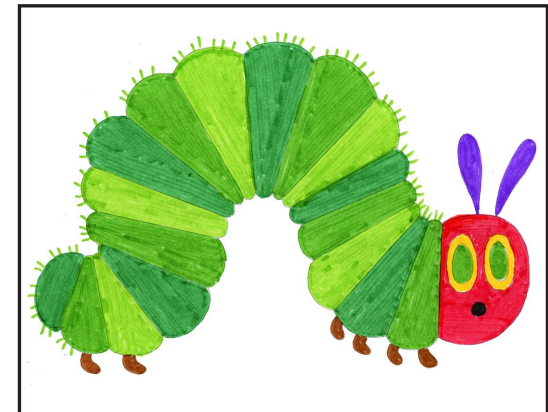

6. Place your pencil on the top and connect the ends to start the squishy shape.

7. Place your pencil on the bottom and jump from end to end to complete the squishy shape.

8. Add the face, antennae and feet. Erase the spine line inside.

9. Fill the pencil drawing with marker color. If possible, use three shades of green for extra color.
