

How to make Solar Eclipse Art

1. Trace a circle to make a template.
Add a small roll of masking tape to the back.

2. Stick circle to center of black paper. Color half of paper with one color of chalk pastel.

3. Blend in the chalk with fingers. It's important to make the colors look soft.

4. Color the top of the paper with another color.

5. Blend the colors with your fingers.

6. Make a white ring around the circle template with white chalk pastel.

7. Blend chalk with your fingers.

8. Add another thin band of white around the circle to make the edge a bright white.

9. Remove the circle stencil and add white dots for stars, if you wish.
