

Cat from Modeling Clay

Model Magic Cat, Part I

Supplies: Main cat color, white, red and black Model Magic, and a plastic knife.

2. Roll a hot dog and cut the main cat color shape in half.

3. Cut the right part of the tube shape in half to make quarters.

4. Take the large half piece and form a cone for the body.

5. Take the next quarter piece and roll to make a head.

6. The last piece is split and shaped into the other pieces needed: a tail, two triangle ears, two cheeks and two round balls for paws.

Model Magic Cat, Part 2

7. Place paws on the body and press the knife to make leg lines.

8. Repeat to make the other two legs lines.

9. Assemble the head with the cheeks, nose and two ears. Make two eyes with small black circles on small white discs.

10. Carefully place the eyes on the face.

11. Place the head on the body and attach the tail to make it wrap around the side.

12. Place your cat on the inside of a lid. If it doesn't stick too well, press a small amount of Model Magic first, to act as glue. Snap the plastic cup on top.
