

Model Magic Penguin Directions

© artprojectsforkids.org

Make all the Model Magic shapes shown.

To assemble your penguin:

1. Attach the white belly spot to the large round black belly.
2. Place this belly on the two round orange feet.
3. Center the roll that is the arms, over the black belly.
4. Attach the round black head on the arms.
5. Place the small black eye dots on the white disc shapes.
6. Attach the beak under the eyes.

Optional: Make a round base for water and place penguin on top to keep it standing up straight.

Also, you could create your own orange color by mixing red and yellow Model Magic together.
